

SURVEY & DATA COLLECTION

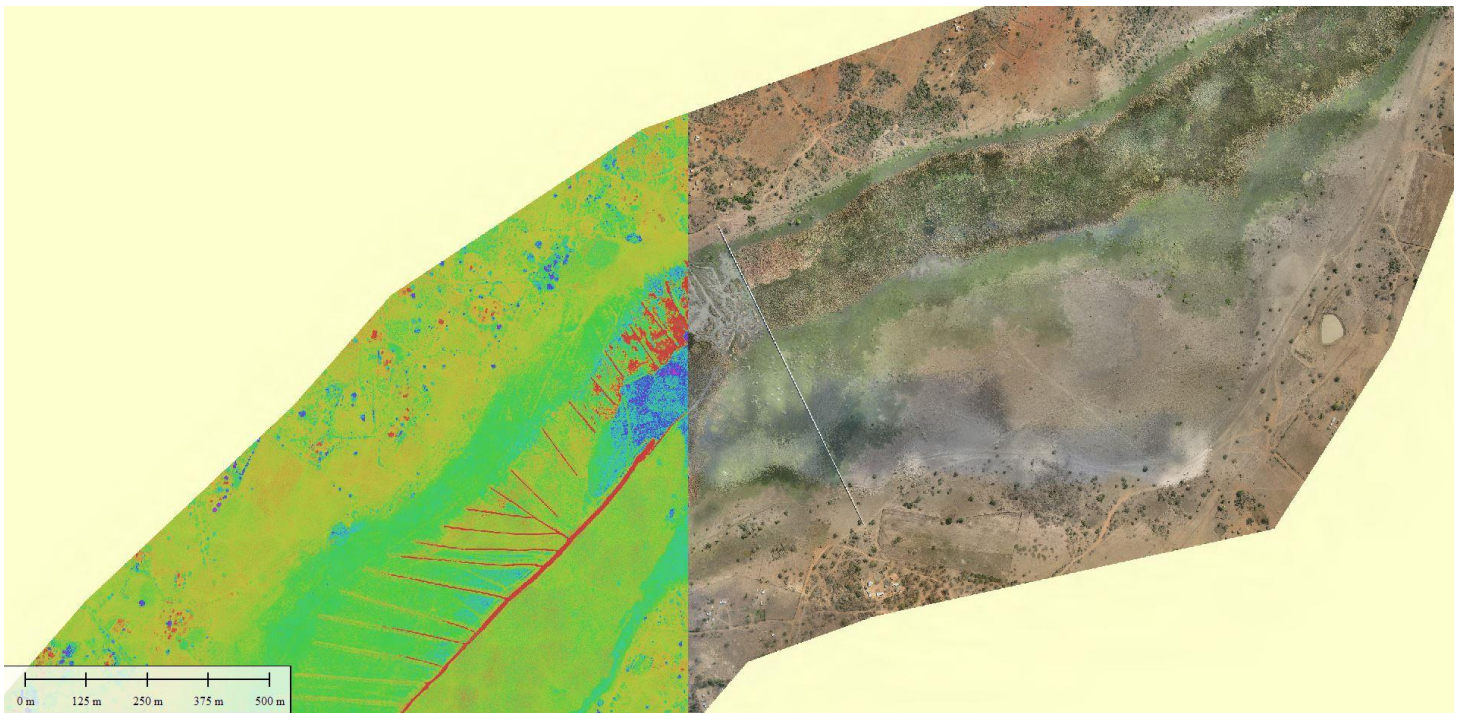

GCS's GIS Unit personnel give us a distinct advantage in having a multidiscipline approach.

The GIS unit's specialised skills include

- Remote Sensing,
- Spectroscopy,
- Hyperspectral Imagery,
- LiDAR survey,
- Photogrammetry,
- Topographic Survey
- Bathymetry &
- Satellite Imagery Processing and Interpretation.

The skills listed above are available over and above all of the existing unit offerings.

GCS has partnered up with various industry leading stakeholders for data collection to ensure that the highest quality data to suit our client's budget requirements and needs are taken care of. The in house expertise ensures that that data collected will be interpreted to useful, useable information by our clients.

For all GIS enquiries please contact Prevlanc Chetty Tel: +27 (0) 11 803 5726 | prevlanc@gcs-sa.biz
